## INTRODUCTION

Final figures from the 1961 Housing Census are shown in this report which is one of a series comprising Volume II (Part 2) of the 1961 Census. Occupied dwellings are classified by specified living conveniences for:

- (i) provinces, rural farm, rural non-farm, and urban size groups (Table 55);
- (ii) counties and census divisions (Table 56);
- (iii) incorporated cities, towns and villages of 5,000 and over, and other municipal subdivisions of 10,000 and over (Table 57);
- (iv) census metropolitan areas (Table 58);
- (v) other major urban areas (Table 59).

It should be noted that figures in this report refer to the number of occupied dwellings provided with specified living conveniences. They do not represent the number of television sets or passenger automobiles, since, as the tables indicate, one household may have two or more of these conveniences.

Data in this report are based on a 20 p.c. sample of dwellings from which hotels, large lodging houses, institutions, camps and other such collective-type dwellings are excluded. Due to sampling variation, estimates of less than 100 are not shown, but are indicated by the symbol (-).

### DEFINITIONS

#### Dwelling:

For census purposes, a dwelling is a structurally separate set of living quarters, with a private entrance either from outside the building or from a common hall or stairway inside. The entrance must not be through anyone else's living quarters.

#### Mechanical refrigerator:

Includes electric and gas refrigerators.

#### Home freezer:

Includes only units which are entirely separate. Refrigerators with a freezing compartment or combination freezers and refrigerators are not included.

#### Television receiving set:

Includes portable television sets, as well as sets belonging to relatives and lodgers who are members of the household.

#### Passenger automobile:

Includes any car or station wagon owned or operated by a member of the household, if used at least part-time for non-business purposes. Not included are panel or other trucks, or passenger cars used entirely for business purposes.

The 1961 Census is the first in which data for home freezers and television receiving sets have been obtained. Comparable figures for earlier years are, therefore, only available for passenger automobiles and mechanical refrigerators. The percentage of homes in which one or more members owned an automobile increased from 36.7 in 1941 and 42.3 in 1951 to 68.4 in 1961. The increase of dwellings with mechanical refrigerators was even more marked from 20.9 p.c. in 1941 and 46.8 p.c. in 1951 to 91.0 p.c. in 1961.

The following statement shows the percentage of occupied dwellings with specified living conveniences, for the provinces, 1961.
